Profile summary :

Passionate Computer Science and Engineering student with a strong foundation in Python, SQL, HTML, and CSS, and growing expertise in full-stack web development. Experienced in building AI-based and full-stack applications through academic projects and hands-on internships spanning frontend development backend architecture and database

EDUCATIONAL QUALIFICATION :

BE - Computer Science and Engineering

PPG Institute of Technology,Coimbatore | (2022 – 2026)

HSC - AMG Matric Higher Secondary School | (2022)

SSLC- AMG Matric Higher Secondary School | (2020)

PROJECTS :

Explainable AI Framework for News Bias Detection and Trust Evaluation [AI,Python,NLP] - Built an AI system that analyzes news articles to find whether the content is biased or Unbiased .Used BERT technique to understand the meaning of the text. Detected different types of bias such as how the news is framed and information is included rather than Missing contents

Learning Management System (LMS) [TypeScript, React, MongoDB] - Developed a full-stack, role-based LMS with dedicated dashboards for students teachers and admins. Features include course/lesson management quizzes and assignments attendance and results tracking a teaching-plan view an events feed and a leave-application module with JWT authentication

Adaptive Email Client App:[React.js,Node.js,smtp] - Built a full-stack email client with React and Node.js that lets users send and receive real emails from a custom web interface. The React frontend offers a clean responsive inbox for composing reading and organizing messages while the Node.js backend integrates directly with SMTP to handle outgoing delivery and incoming mail retrieval

INTERN EXPERIENCE :

Web Developer Intern, KAR International Infotech

(2026)

Contributed to live web development projects, working on frontend features and enhancements for real client applications. Collaborated with the development team to build and refine responsive UI components translate design requirements into functional code and troubleshoot issues

Cybersecurity Intern, CSUITE Tech Lab

(2025)

Worked on identifying and responding to real-world security threats learning how vulnerabilities are detected and mitigated in practice. Focused on implementing preventive measures against unauthorized access and on maintaining data accuracy, reliability and availability

Full Stack Java Intern, APPIN Technology

(2024)

Built a train ticket booking website as a full-stack Java project, handling both frontend and backend development. Gained hands-on experience with real-world application architecture, including user-facing booking flows connect to backend logic and data storage

TECHNICAL SKILL :

Python Programming , SQL, HTML, CSS, JavaScript , Typescript, Cloud computing

PARTICIPATION & CERTIFICATIONS :

- NPTEL - Cloud computing
- **Research Paper Title:** Paper Published “ *An Explainable AI Framework for News Bias Detection and Trust Evaluation*”
- Robomatiic - Database management (MongoDB & RDBMS)
- Data analytics - Deloitte virtual internship
- Hackathons & Ideathons - Participated in Tech Trek Hackathon ,Techno Kreaticon Ideathon
